

Appointment Reminder and Patient Communication

Doctor Connect

No More No Shows! DoctorConnect alerts your patients with automatic Text, Voice, and Email appointment reminders. Our reminders are proven to drastically reduce 'no-shows' and stimulate repeat business. Our Text Appointment Reminders are much less intrusive than a phone call and much less resource intensive for your staff.

All of our appointment reminders are '2-way' meaning your patients will be able to confirm or request a reschedule via text, email or phone. For example, if a patient gets a text appointment reminder, they can reply to that message with a '1' to confirm the appointment.

Hot Features

- Unlimited appointment reminders - text, email, voice
- Interactive reminders allowing patients to confirm, request or reschedule
- 2-way text for staff-patient communication
- Bulk text - employee notifications, emergencies
- Time block text & email - Severe weather notifications, rearranging provider schedules & emergencies
- Multilingual reminders - English, Spanish, French & More
- Immediate notice to your patients when test results are ready
- Automated quality of care surveys or birthday greetings
- Seamlessly integrate with your current EMR/EHR/PM solution
- All inclusive flat monthly fee including Unlimited messaging

HIPAA Compliant

How Much Revenue Are You Throwing Away?

With Doctor Connect, your practice will drastically decrease 'no-show' appointments, save valuable office personnel time, and increase your patient satisfaction by using state of the art text, email and voice reminders to streamline your appointment scheduling.

Confirmations, reschedules, and unconfirmed appointments can be easily viewed from your dashboard - or even passed back to your existing compatible office software.
